Ref: internal blasting and coating

To Whom It May Concern:

The company Van Zonderen and affiliate Notus have performed some specialist internal coating and blasting works at our yard with exceptional good results. Not only the quality of the coating was high but also their way of working perceived as very professional. The feedback we received from our clients was along the same lines; the pricing was on par or below European prices and definitely below customary pricing in the North American, Gulf and Caribbean area.

Works were carried on board of the following vessels in 2004:

- CSD Amazone
- W.H. Blount
- Lorelay
- DP Provider I

We are looking forward to carry out future internal blasting and coating works with Van Zonderen and affiliate Notus.
